PROBLEM PRESENTATION

Somali had gone through three-decade-long clan-based civil war and still lacks a stable government. This prolonged civil war and ensuing chaos caused a humanitarian situation which is yet to be taken care of. Hundreds of thousands were displaced and forced to flee to their clan strongholds empty handed. The next of kin of these families had either been killed or maimed in the civil war.

Around 300 families settled in Kulub sea coast (see the map) but lack means to eke out their living from the marine resources available. They formed fishing cooperatives but haven't got the means to stay on course.

Shafshafo for Relief and Development is trying to support these Fishing Cooperatives stand on their feet. Oogta Fishing Cooperative is largest one which Shafshafo for Relief and Development is using as pilot project to help out the fishing cooperatives to stand on their feet.

EXECUTION OF THE PROJECT

Shafshfo for Relief and Development Organization is implementing this project. Shafshafo had carried out many relief and development programs in Somalia. The profile of Shafshafo is herewith attached.

confronted. It was founded by community leaders and scholars who saw the need to respond to the suffering of the Somali people, following years of civil strife, subsequent displacement, the plight of the vulnerable sections of the society like helpless widows, orphans, elderly people who lost their kith and kin in the strife. In Somali, the very word '**Shafshafo**' stands for 'initial healing' or 'first-aid care', and this very name reflected the principles on the basis of which it was formed.

It was founded in Garowe, the capital city of Puntland, at the height of suffering of the Somali people due to the prolonged civil war. Shafshafo's activities reach out the needy in the urban centers and the rural where the most vulnerable of the Somali people live. The main objective is to alleviate the suffering of these people.

Shafshafo's main office is in Galkaio, the capital city of Mudug region of Puntland State of Somalia. Galkaio has been one of the cities that suffered the worst in the Somali civil war. The city exchanged hands of hostile forces several times. It became a ghost city at the height of civil war in 1990s and was completely deserted.

The Vision

The vision of Shafshafo centers around developing the communities within its reach and paving the way for self-sustainability of a community which is still reeling under the after-effects of decades of strife. Its main tasks include

- Enabling and empowering the victims of war to recover from difficulties inherited from natural disasters and man-made problems and supporting the weaker sections of the Somali society
- Empowering the Somali community to grow out of its dependency on welfare handouts and develop self-reliance.
- Making these people to be productive members of the society they are in
- Deterring the youth from joining deviant groups like extremists, pirates, criminals, and all other activities which lead to social evils by providing skill-oriented programs.

Domain of Activities

Shafshafo lobbies relief for the vulnerable sections of the Somalia community from donor organization. It runs feeding kitchens during the holy month of Ramadan, distributes dry food for the needy. In order to ensure that the beneficiaries of relief do not overstay the benevolence of the donors, Shafshafo carries out training programs and provides vocational training for the orphans and the young widows to empower them to self-support. These programs involve running bakeries, tailoring, air-conditioning. Shafshafo runs a number of workshops for carpentry, prick-laying, metal work, etc. It also tries to support the main health centers and helps prevent major health hazards like water-borne diseases, pollution-prompted health issues by recommending and inculcating correct health measures in consultation with the local medical doctors and providing training workshops.

Water is scarce in Puntland and that scarcity is part of the hardships prevailing in the region. The sources of water are the hand-dug wells and contaminated rainwater catchments which pose a great health risk. This water is used for drinking by both humans and the animals. Acquisition and Installation of protected deep wells is one of the tasks of this Relief Organization is trying to carry out.
